

PATENT APPLICATION
DOCKET NO. 1238-0006

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Canceled)

Claim 2 (Currently amended): The seat assembly of claim ~~4~~ 8, wherein the means for slidably supporting the two overhanging edges of said basket is two guide rails mounted on the underside of said horizontal surface, each guide rail forming a lip to support each overhanging edge of said basket.

Claim 3 (Currently amended): The seat assembly of claim ~~2~~ 8 wherein each guide rail is affixed to the first and second brace supports to provide additional stability to the seat assembly.

Claim 4 (Currently amended): The seat assembly of claim ~~4~~ 8 further comprising means for affixing said basket to an edge of said horizontal surface.

Claim 5 (Original): The seat assembly of claim 4 wherein the means for affixing said basket to an edge of said horizontal surface is an adjustable rod affixed to the horizontal surface and extending from the edge of the horizontal surface to retain said basket against the edge of said horizontal surface.

Claims 6-7 (Canceled)

Claim 8 (Currently amended): A portable seat assembly for use by a person bathing, the seat assembly comprising:

a sitting horizontal surface constructed of a rigid material and having a plurality of holes;
four support legs attached to an underside of said horizontal surface, said four support legs and horizontal surface being unattached to any flooring or wall;

PATENT APPLICATION
DOCKET NO. 1238-0006

a basket slidably having a plurality of apertures mounted to the underside of said horizontal surface, said basket having:

 a generally horizontal bottom surface;
 four generally vertical sides affixed to the bottom surface, the four sides and bottom surface forming an enclosure for storing shower supplies; and
 two overhanging edges extending outwardly from a top portion of two opposing sides of said basket; and

 means for slidably supporting the two overhanging edges of said basket on the underside of said horizontal surface; and

means for affixing said basket to an edge of said horizontal surface;
 whereby said basket may be slid horizontally outwardly either fore or aft from said horizontal surface and the person may sit on said horizontal surface.

Claims 9-11 (Canceled)

Claim 12 (Currently amended): The seat assembly of claim 11 ~~8~~ wherein the means for affixing said basket to an edge of said horizontal surface is an adjustable rod affixed through a hole of said horizontal surface and extending from the edge of said horizontal surface through an aperture of said basket to retain said basket against the edge of said horizontal surface.

Claim 13 (Original): The seat assembly of claim 8 further comprising a cover pivotably mounted to the underside of the horizontal surface.

PATENT APPLICATION
DOCKET NO. 1238-0006

Claim 14 (Previously amended): The seat assembly of claim 13 wherein the means for slidably supporting the two overhanging edges includes a plurality of outcroppings; whereby said cover is tilted when said basket is slid outwardly from under said horizontal surface.

Claim 15 (Canceled)
